

## Applied Management Professionals (AMP) Program

Applied Management Professionals (AMPs) work in teams with you to accomplish your top priorities. Through this program AMPs deliver valuable support in a concentrated timeframe at an economical market rate. In addition, M Squared provides trainings so AMPs are best equipped to meet your needs.

### What is the Government's Role in a Successful AMP Program?

As the Government Sponsor, you play an important role throughout the summer. Based on our past years' accomplishments, we have identified several important criteria for a successful AMP Program. We ask that the government sponsor:

- Clearly define the project scope and objectives
- Directly engage with AMPs several times per week
- Provide opportunities to interact with a variety of senior managers
- Advocate for AMPs and facilitate necessary meetings
- Secure building access
- Furnish desk space and office equipment
- Participate in quality assurance

*"AMPP far exceeded our expectations. The AMPs were professional and produced high quality deliverables, impressing senior leadership with their thorough work. It was salient and highly valuable to the organization."* –DOE NNSA

### How Does M Squared Assure Quality Support?

M Squared assigns a dedicated Team Lead to supervise each AMP Program project. The Team Lead:

- Teaches specific skills and mentors the AMPs
- Provides oversight for quality and timeliness of delivery
- Ensure that contractual reporting requirements are met

\* AMPs sign an NDA with M Squared, necessary government NDAs, and an M Squared restrictive covenant protecting intellectual property.

### Program Schedule

#### January

M Squared Strategies engages with government stakeholders to determine client interest / need

#### February – March

M Squared and Government Sponsors meet to determine AMP Program requirements

#### April – June

M Squared and Team Lead coordinate with Government Sponsor to arrange building access, desk space and equipment

#### Mid-June – Mid-August

AMP Program
